

It's Aigner for the Highest-Efficiency Label Holders Top to Bottom.

Aisle Sign Kit

That's labor-saving and cost-cutting efficiency. It starts at the **TOP** with customized, inter-changeable aisle label holders that snap in and identify locations at a glance, when they are laser or ink/jet printed. Change them for the cost of paper!

Our matte finished, clear Super•Scan® label holders are ideal on pallet racks right in the **MIDDLE** of the action.

Super•Scan®

They provide accurate bar code scans, easy reading, label protection and can be readily changed.

For the **BOTTOM**, the new Aigner permanent floor labeling kit offers floor identification that's easy to apply, simple to update and virtually indestructible.

In all areas, you're spared the replacements and messiness of self-adhesive labeling.

Floor Labeling System

From **Top-to-Bottom**, Aigner now provides you with most efficient, effective warehouse labeling available!
