

5S and Aigner Label Holders!

Look to the Leader in
Label Holders for Your **Lean 5S** Solutions

Label Holder Solutions for 5S Projects

Implement Your 5S Methods with Aigner

Aigner Label Holder Corporation provides efficient and cost effective solutions to most LEAN / 5S projects. 5S methodology is the planning and implementation of waste reduction and productivity gains that are the result of an orderly, well organized and most importantly **Clearly Labeled** storage locations.

The Five Pillars of 5S

Sort, Set In Order, Shine, Standardize & Sustain the Cycle.

- **SORT** Sort out what is needed and eliminate what is not needed.
- **SET-IN-ORDER** Labeling is the KEY. “A place for everything and everything in its place”
An age old adage that saves time and money every day.
Aigner manufactures label holders for bins, totes, shelving, racks and more.
- **SHINE** Clean and inspect for standards and defects.
- **STANDARDIZE** Revisit Sort, Shine and Set-In-Order on a regular basis
- **SUSTAIN** Organizational Commitment to maintain 5S

Simple and Quick Designation or Location Changes

Insertable plastic label holders make it easy to change a label or location. Simply re-mark the insert and slide it into the holder. This feature was pioneered by Aigner Label Holder Corp over fifty (50) years ago for the filing industry, and since, has been adapted to every storage application imaginable.

Better Organization of Storage

Every efficient storage facility must know where everything is - All of the time. This would be much easier to accomplish if products and locations did not change, but they do, and that's when problems develop. Label Holders are a management tool that offers a solution. They even make a better working environment for the employees to be more productive.

**Label Holders Pay You Back
in Time Saved, Over & Over**

Visual Benefits of Insertable Label Holders

Insertable card stock labels provide the added benefit of being easy to read and well protected from dirt and damage that can occur with unprotected adhesive labels. High Quality white laser paper with general formatting and printing instructions are provided to allow easy printing and customization of text, fonts and colors. Color Coding is easy with a simple change of paper label insert color. Clearly labeled storage locations are Key to any Lean 5S initiative.

Cost Justification is Easy

The total cost for a label holder system rarely exceeds 4% of the total warehouse cost, yet no other single function contributes more savings. Whatever the initial investment is for a Label Holder System, it has been very well documented that payback in materials, labor and overall efficiency will be justified by:

Protecting Bar Codes is a Must

Most storage and distribution facilities either use an automated barcode inventory system or expect to start in the near future. Barcodes must be protected from dirt, moisture and chemicals to prevent an inaccurate scan. This would obviously create an inventory discrepancy or possibly even a lost customer. Most of Aigner's clear plastic insertable label holders come in a matte, non glare finish, which ensures scanning compatibility while protecting the barcode.

Little or No Cost for Printing Labels

No need to contract outside printing service for label designations. Most label holders are supplied with pre-perforated laser/ ink-jet compatible sheets and simple printing instructions in a standard "word" processing format. The laser stock is a high quality 60lb cover in bright white or an array of colors. Print neat and professional labels, in house, well in advance or on demand at virtually no additional expense.

Label Holders for Every Storage Solution

Years of consumer demand for new product development has resulted in a wide selection of label holders with a choice of backings. Permanent self adhesive for permanent applications or removable self adhesive, magnetic and fabric hook and loop fasteners for the versatility to relocate the label holder. These options feature change and relocation of the paper insert. All were engineered to solve a specific labeling problem. Here's a short list of solutions for the major storage applications:

Aisle Signage –

“Slip ‘n Stik” Insertable plastic aisle sign kit’s plastic holder mounts into the assembly holes on the face of pallet racks or shelving uprights. This starts the warehouse mapping process. Print paper inserts on a laser or ink-jet printer – change as often as required for only the cost of paper.

Pallet Racks –

“Super•Scan®” features larger sizes (3” x 5”, 4” x 6”, 5” x 8”) for better visibility. Barcode compatible, non-glare finish in self adhesive or magnetic backings, top or side loading. Mix and Match for the perfect labeling solution. Laser inserts included.

Steel Shelving –

Several styles, including patented “Hol•Dex” in many size options, side or top loading, self adhesive or magnetic backing. Laser Inserts available.

Wire Shelving –

“Wire•Rac” Label Holders offer five (5) separate styles to fit most major brands of wire shelving. Snap-on to install, snap-off to re-locate. Barcode compatible matte finish and laser inserts are all standard.

Tri-Dex Label Holders for Slotted Plastic Bins -

Are made of crystal clear PVC which is fabricated to a tri-fold configuration that seals and protects the label. No adhesive backing is required. Just laser print a label, slide it into the holder and snap it into place. Change it as often as required. Five popular sizes are available to retro-fit most major manufacturer’s standard bins. Laser Inserts are included with printing instructions.

Plastic Bins and Totes -

“Bin•Buddy’s” feature permanent self adhesive backing engineered for smooth plastic surfaces. Four (4) popular sizes, bar code compatible, with laser inserts included.

Floor Storage –

Floor labeling kit with durable “oval” aluminum frame and clear Lexan protective cover plus hardware. Print polyester labels in house on thermal transfer printer and install, in less than five (5) minutes.

Return on Investment

SET-IN-ORDER

REDUCE
WASTE

INCREASE
PRODUCTIVITY

This is what it’s all about. At what point does your investment in label holders start to pay monetary returns? Calculate the total savings on time and materials and consider the contribution to productivity from a better overall working environment.

The results of case studies performed by major retailers confirm that the return on your initial investment will occur within a twelve (12) month period after the purchase.

Labeling is the KEY! *“A place for everything and everything in its place”*

Aigner Label Holders

are distributed through most national industrial supply companies such as: Grainger, Global Equipment, MSC Direct, Fastenal, C & H Distributors, McMaster-Carr and over 4,000 Material Handling Dealers Nationwide.
